**MATERIAL SAFETY DATA SHEET (MSDS)****SODIUM SULPHATE LR (ANHYDROUS)****1. Product Identification**

**Synonyms:** Sodium sulfate decahydrate; disodium sulfate decahydrate; glauher's salt; sulfuric acid, sodium salt, decahydrate; sodium sulfate, 10-hydrate

**CAS No.:** 7757-82-6 (Anhydrous) 7727-73-3 (Decahydrate)

Product Coad: S0192300500

**Molecular Weight:** 322.20

**Chemical Formula:** Na<sub>2</sub>SO<sub>4</sub>.10H<sub>2</sub>O

**2. Composition/Information on Ingredients**

Ingredient	CAS No	Percent
Sodium Sulfate	7757-82-6	98 - 100%

**3. Hazards Identification**

**Emergency Overview** As part of good industrial and personal hygiene and safety procedure, avoid all unnecessary exposure to the chemical substance and ensure prompt removal from skin, eyes and clothing.

**Inhalation:** Not expected to be a health hazard.

**Ingestion:** Mildly toxic by ingestion. Systemic toxicity is unlikely unless massive amounts have been swallowed. Drinking water with > 500 mg/L may result in gastrointestinal irritation.

**Skin Contact:** No adverse effects expected.

**Eye Contact:** No adverse effects expected but dust may cause mechanical irritation.

**4. First Aid Measures**

**Inhalation:** Not expected to require first aid measures. **Ingestion:** Give several glasses of water to drink to dilute. If large amounts were swallowed, get medical advice. **Skin Contact:** Wash exposed area with soap and water. Get medical advice if irritation develops. **Eye Contact:** Wash thoroughly with running water. Get medical advice if irritation develops.

**5. Fire Fighting Measures**

**Fire:** Not considered to be a fire hazard.

**Explosion:** Not considered an explosion hazard, but violent explosions occur when potassium sulfate and sodium sulfate are melted with aluminum.

**Fire Extinguishing Media:** Use any means suitable for extinguishing surrounding fire.

**Special Information:** Use protective clothing and breathing equipment appropriate for the surrounding fire.

**6. Accidental Release Measures**

Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Spills: Sweep up and containerize for reclamation or disposal. Vacuuming or wet sweeping may be used to avoid dust dispersal.

**7. Handling and Storage**

Keep in a tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Isolate from incompatible substances. Containers of this material may be hazardous when empty since they retain product residues (dust, solids); observe all warnings and precautions listed for the product.

**8. Exposure Controls/Personal Protection**

**Airborne Exposure Limits:** None established. **Ventilation System:** In general, dilution ventilation is a satisfactory health hazard control for this substance. However, if conditions of use create discomfort to the worker, a local exhaust system should be considered. **Personal Respirators (NIOSH Approved):** For conditions of use where exposure to dust or mist is apparent and engineering controls are not feasible, a particulate respirator (NIOSH type N95 or better filters) may be worn. If oil particles (e.g. lubricants, cutting fluids, glycerine, etc.) are present, use a NIOSH type R or P filter. For emergencies or instances where the exposure levels are not known, use a full-face positive-pressure, air-supplied respirator. **WARNING:** Air-purifying respirators do not protect workers in oxygen-deficient atmospheres. **Skin Protection:** Wear protective gloves and clean body-covering clothing.

**MATERIAL SAFETY DATA SHEET (MSDS)****SODIUM SULPHATE LR (ANHYDROUS)**

**Eye Protection:** Use chemical safety goggles. Maintain eye wash fountain and quick-drench facilities in work area.

**9. Physical and Chemical Properties**

**Appearance:** White efflorescent crystals or granules.

**Odor:** Odorless.

**Solubility:** Soluble in 1.5 parts of water @ 25C (77F).

**Specific Gravity:** 1.46

**pH:** Aqueous solution is neutral.

**10. Stability and Reactivity**

**Stability:** Stable under ordinary conditions of use and storage. Effloresces in dry air.

**Hazardous Decomposition Products:** Oxides of sulfur and sodium may form when heated to decomposition. **Hazardous Polymerization:** Will not occur.

**Incompatibilities:** In combination with sodium sulfate, aluminum and magnesium will explode @ 800C (1472F); strong mineral acids and bases.

**Conditions to Avoid:** Air, incompatibles.

**11. Toxicological Information**

Investigated as a tumorigen, mutagen, reproductive effector. No LD50/LC50 information found relating to normal routes of occupational exposure.

---NTP Carcinogen---

Ingredient	Known	Anticipated	IARC Category
Sodium Sulfate (7757-82-6)	No	No	None

**12. Ecological Information**

**Environmental Fate:** When released into the soil, this material is expected to leach into groundwater. This material is not expected to significantly bioaccumulate.

**Environmental Toxicity:** This material is not expected to be toxic to aquatic life. The LC50/96-hour values for fish are over 100 mg/l. The EC50/48-hour values for daphnia are over 100 mg/l.

**13. Disposal Considerations**

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

**14. Transport Information**

Not regulated.

**15. Regulatory Information**

NA

**16. Other Information**

**NFPA Ratings:** Health: 1 Flammability: 0 Reactivity: 0

**Label Hazard Warning:** As part of good industrial and personal hygiene and safety procedure, avoid all unnecessary exposure to the chemical substance and ensure prompt removal from skin, eyes and clothing.

**Label Precautions:** None.

**Label First Aid:** Not applicable.

**Product Use:** Laboratory Reagent.
